WEBINAR

GIG CYMRU NHS WALES | Addysg a Gwella Iechyd Cymru (AaGIC) Health Education and Improvement Wales (HEIW)

Emergency Contraception Demystified

Overview:

Emergency contraception (EC) as an enhanced service has been delivered from Community Pharmacies for several years. More recently, there have been changes to the Faculty of Sexual and Reproductive Healthcare (**FSRH**) guidance with revised Patient group directions (PGDs) provided by all health boards.

If you are accredited to deliver the emergency contraception enhanced service from community pharmacies, this webinar is for you. Whether you are new to the service or an experienced pharmacist, there will be useful information highlighted in this session.

- *Do you know when Ulipristal cannot be given?*
- *Do you know current and up to date Ulipristal and missed pills rules?*
- *What's best to do Mid Cycle?*
- *What is the best post coital contraception, and when is each method most appropriate?*
- *Which interactions do you need to be aware of?*
- *What should you do if someone comes back wanting more EC a few days later?*
- *What are the rules if someone is taller or heavier than average?*

Join us on this informative session to refresh and clarify your knowledge to support you further in the use and delivery of emergency contraception services from community pharmacies.

If you do not currently deliver the enhanced service, you are welcome to join for information purposes, however usual accreditation rules apply for service delivery.

BOOK NOW
